

Job Title: Software Engineer

Req ID 4922 - Posted 20/12/2017

EUROPEAN SPACE AGENCY

Vacancy in the Directorate of Technology, Engineering and Quality.

ESA is an equal opportunity employer, committed to achieving diversity within the workforce and creating an inclusive working environment. Applications from women are encouraged.

Post

Software Engineer

This post is classified A2-A4 on the Coordinated Organisations' salary scale.

Location

ESTEC, Noordwijk, The Netherlands

Description

Software Engineer in the Flight Software Systems Section, Software Systems Division, Systems Department, Directorate of Technology, Engineering and Quality.

The Flight Software Systems Section provides functional support to ESA projects and carries out research studies (R&D) in the field(s) of real-time embedded software systems, flight software systems development and software validation facilities.

Duties

Reporting to the Head of Section and within the technical fields described above, the main tasks and responsibilities of the post holder will include:

- providing expert technical support and consultancy to ESA projects, programmes and general studies in the field of real-time embedded software systems, flight software systems development and software validation facilities;
 - participating in feasibility studies, project reviews and evaluation of procurement proposals;
 - identifying critical development problems and assisting in their resolution;
 - contributing to the definition of technology development requirements and work plans for the Agency's technology programmes;
 - defining, initiating and managing R&D activities covering both long- and short-term needs;
 - fostering new application areas for multidisciplinary activities, placing emphasis on innovative concepts, cutting-edge technologies and system architectures;
 - monitoring applicable scientific and technological trends and maintaining a state-of-the-art expertise;
 - contributing to the dissemination of the results of the activities performed and the transfer of knowledge across the Agency
- Duties may also include supporting other activities within the post holder's field of competence.

Technical competencies

Software engineering methods and tools

Real-time embedded software

Experience in software development projects

Spacecraft systems knowledge

Project support experience in a relevant domain

Experience in the management and monitoring of industrial activities, including participation in reviews

Experience with Space Engineering Standards and their preparation and implementation

Behavioural competencies

Communication

Teamwork

Problem Solving

Results Orientation

Planning & Organisation

Continuous Learning

Education

A Master's degree or equivalent qualification in computer science and/or electrical engineering is required.

Additional requirements

Applicants for this post should have a background and experience in embedded real-time systems. Extensive knowledge of modern software engineering and practical experience in spacecraft software engineering is required.

Other information

For behavioural competencies expected from ESA staff in general, please refer to the ESA Competency Framework.

The working languages of the Agency are English and French. A good knowledge of one of these is required. Knowledge of another Member State language would be an asset.

The Agency may require applicants to undergo selection tests.

The closing date for applications is 31 January 2018

If you require support with your application due to a disability, please email contact.human.resources@esa.int.

Please note that applications are only considered from nationals of one of the following States: Austria, Belgium, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Romania, Spain, Sweden, Switzerland, the United Kingdom and Canada and Slovenia.

According to the ESA Convention the recruitment of staff must take into account an adequate distribution of posts among nationals of the ESA Member States. Priority will first be given to internal candidates and secondly to external candidates from under-represented Member States when short-listing for interview.
